Village house to reform with great potential given its surface and buildability.

It has a plot area of 200 square meters and a current constructed area of 508 square meters. It is divided into 3 floors, with a house on the ground floor with independent access and a house on the top floor with access to a second floor and two large terraces. In addition, the house has access to by garage and possibility of demolishing a part to have a patio or garden.
